

CHANGE OF ENTITIES

Transmigration of soul is just not a rebirth or a reincarnation.

The phrases rebirth and reincarnation are denoting a beginning from the womb of a physically current mom. On the contrary, transmigration of soul is not so.

Transmigration of soul is denoting the process of taking up the bodily vehicle of another person who is already present upon the physical world. Transmigration is undergone after an entity crosses past the stage from where delivery from the womb of a physical mother can take place. [Resurrection](#)

However as a result of the macrocosmic legal guidelines are equally applicable to every microcosm, so this means of taking up the physical vehicle of one other particular person can only start after an settlement is made with that particular person and that too in the refined or astral worlds.

When an individual sleeps, then the astral physique or Sookshma Sharira goes out of the bodily physique and it is at the moment when the astral automobile is roaming freely inside those vast macrocosmic fields of past realms that an settlement between the one who to be transmigrated and the donor of the bodily vehicle, will get made.

Once the agreement is made, then there also are needed helpers for this job. These helpers may be people who know about this course of. These knower's will be sages who dwell upon that physical world or in past worlds or they could even be divine beings of past realms.

During the technique of transmigration of soul, the diamond white wire which is emanating out of the top of head of the physical automobile of the donor and is of a triangular form, is minimize off ... And instantly the cord of the transmigrating one is connected to the identical place. This denotes the completion of process of transmigration. This diamond white cord can also be termed because the silver wire in the Biblical lore's and this has additionally been termed as Brahma Naadi in the much earlier Yoga Tantra's.

Depending on the evolutionary standing of the one who's entering into the process of transmigration, are the helpers who get chosen for this assisting throughout the process of transmigration of soul. Increased is the evolutionary standing of the one who's getting transmigrated, larger would even be the evolutionary standings of the helpers who help in that technique of transmigration.

Foundation above, if the one who is transmigrating is already that person who has gone beyond the beyond and is barely returning again as a macrocosmic instrument or as an instrument of Maker's Makings and that too for doing sure particular jobs which are either dictated by macrocosmic deities or by macrocosmic divinities or by time and its eternal cycles i.e. during change of a human of divine age cycle, then such

transmigrations can solely be assisted by a Non Human Man (i.e. Amanav Purusha) and by a number of of the macrocosmic deities of these a lot beyond or refined methods.

And since transmigration of soul is the process of taking on a physical car which is already current in the bodily world, so this course of was additionally called as Parkaya Pravesh in the Vedic and Yogic Sanskrit lore's. Biblical lore have termed this means of transmigration as that of a Virgin Beginning.

And there are also those circumstances the place the one who was to transmigrate to a lower world is already resting in an impressionless state of his personal consciousness i.e. Samskara Rahit Awastha of Chitta, which as such denotes a situation of existence which is past the purviews of the Maker's Makings, so for such a one to transmigrate to a lower world, one other appropriately developed aspirant is implanted into that world i.e. that appropriately advanced soul is made to take beginning in that world, in order to arrange the physical car for the later transmigrating one. However there are numerous types of transmigrations, so our mentioned one shouldn't be the one sort of transmigration.

As it is inside any earthly settlement, so is it within the refined settlement of transmigration of soul. Thus when the agreement is made between the transmigrating one and the one who's the donor of the bodily car, then the donor can ask for anything from the transmigrating one as a result of from the macrocosmic viewpoint, donating of one's personal physical vehicle is naught but a supreme sacrifice.

And after this agreement is made after which transmigration undergone already, then the one who transmigrated also needs to comply to all that was agreed for in the course of the technique of transmigration.

Foundation above, the donor can even switch all his good and dangerous deeds that he had ever accomplished during any earlier stage of his evolutionary existence, but inside the purviews of the rules, course of and laws of the Maker's Makings. This was my case this time around because the donor transferred all his Karmas to me.

And if that transmigrating one who adopts these Karmas of the donor, is already past Karmas and Karma Phala (i.e. cause and effects or deeds and fruits respectively) then since as per the "principle of eternal evolution" there can't be any regression from an already attained evolutionary standing, all these Karmas which have been taken over, would also should be nullified and their impressions unseeded from within the consciousness orb or Chitta of the transmigrating one. Unless this is completed, that transmigrating one cannot even start doing that for which he or she had transmigrated. This means of unseeding the impressions that have been taken over from the donor might even take as much as 28 years, as was my case this time around.

And even when above is a matter of truth, yet after unseeding of all adopted impressions, one last and ultimate impression i.e. Antim Samskara, at all times stays because this last and final impression can't ever be destroyed or unseeded by any transmigrated entity. The

last and closing impression can only be unseeded by the original holder of it i.e. the donor of the physical car.

Thus so far as the transmigrated one is worried, after unseeding of all impressions other than the last and ultimate impression is done, then this final impression or Antim Samskara, additionally get evicted out from the highest of the top of the bodily car of that transmigrated one and then this impression eventually gets transferred to the original donor of the bodily car. So regardless of which of the subtler realms that donor may be residing at the moment, when the final impression get evicted out of the highest of head of the transmigrated one, then it might attain that donor and that donor would also should undertake it.

And it will definitely is that this impression which ensures that the donor would return back in future, but only for one final and ultimate time so as to unseed the final impression and thus “Be Liberated”.

I wrote “Be liberated” and not “Get Liberated” as a result of getting is via the path of deeds and quite the opposite, “being” is the pure path which rests beyond deeds. That pure path is inside everybody and it may be recognized via the inward path or path of self realization.

So foundation above, during those distant times, that little baby whose physique was taken over this time around and who had asked for taking over all his past deeds and fruits, would undoubtedly be returning again to bodily realms so as to stroll these paths which unseed his last impression and thus would he also “Be Liberated”.

Transmigration can also be reflected in the astrological beginning charts, but to know this aspect the astrologer would need to carry the timeless lineage of Vedanga and Jyotish in addition to being blessed with a divine eye to see it after studying about it within the birth charts of the donor.
